MINI PROJECTS

Mailing Server

- Designed and Developed an Intranet Web based mail client system connecting to server, running a mail server and with Apache as the web server.

Student Identifier using B-Tree Indexing

- B-Tree is a method of placing & locating files (called records or keys) in a filesystem. It is a multi-way tree in which all insertions are made at the leaf level. It uses bottom up approach.

Travel Destination System

- The system can handle all details about travel. The purpose of it is to computerize the data maintained in travel system. The application will be user friendly, simple, fast and cost-effective.

FINAL YEAR PROJECT

AUTOMATED SURVEILLANCE SYSTEM TO MONITOR HUMAN PRESENCE IN AN ENVIRONMENT
Knowing the exact number of persons in a building, building -floor, or a single room can be critical for the success of business or rescue operations. Therefore, shopping centres, are required to know the exact number of persons present in their premises, at any point in time.
